GOALS

Technology Integration Training k-12

PERSONAL STATEMENT

My classroom and professional experiences have encompassed a wide range of teaching, technology integration, and professional development experiences across the k-12 curriculum. Over 30 years of experience as a classroom teacher, technology integrator in the English and Science/Robotics classrooms, and cooperative work with k-12 teachers, school librarians and network technicians give depth to my understanding of the challenges and frustrations facing teachers and institutions today. Teaching, advising and coaching give depth to my understanding of and appreciation for children in all stages of development.

I bring to a school a passion for the use of technology for collaboration and learning.

RECENT WORKSHOPS

Using PowerPoint in an Educational Setting - Library Connections, NYC
The Essential Web - American Institute for Creative Education, Brunswick ME
Digital Mapping with Inspiration and TimeLiner - CAIS
Laptops in the English Classroom - Nyack Middle School, Nyack NY

EDUCATION

1970 BA Middlebury College, Cum Laude American Literature
1972 MLS Rutgers University School of Library Service, Beta Phi Mu
1990 NEH Fellowship to study Children's Literature at Princeton University

EMPLOYMENT

Current - Professional Development Trainer and Consultant, Least Tern

2000-2003 **The Chapin School**, NYC - Technology Department Head k-12, technology teacher 4-12, Class 5 Advisor, Club advisor, Pioneer Trainer;

With Network Services, developed and oversaw budget and disbursement of Title II technology funding;

Developed Computer Science curriculum sequence, including "hands-on tech" in Lower School, Lego/Logo science/robotics program (team taught), and expanded course offerings in multimedia, software toolkits, and programming;

Upgraded the hardware profile of school, including implementation of mobile iBook programs, faculty laptop distribution, publication and media labs;

Supervised and provided multi-level professional development in technology tools and skills for faculty and staff;

Developed and improved faculty information systems, including grade reporting, calendars, e-mail, and Intranet;

Advocated for and supported faculty use and exploration of new technologies and software, including digital media, portable devices, presentation software and technologies;

Expanded and enabled student access to the Internet, e-mail, media production facilities and equipment and digital publication facilities.
